

Scooby (SCOO) – WHITEPAPER

● Cover

Scooby (SCOO) – The Next Meme King

🔥 Forever Burned, Forever Strong

- From 420T to 79T → Scarcity Creates Value
- LP Burned & Ownership Renounced → No Rug
- Deflationary Supply until 21B
- Powered 100% by the #ScoobyArmy

● Executive Summary

Scooby (SCOO) is a next-generation meme coin built on Ethereum with deflationary tokenomics, renounced ownership, and a forever burned liquidity pool.

From an initial supply of 420T, over 341T were burned, leaving only 79T tokens in circulation.

- Liquidity Pool tokens burned forever
- Ownership renounced (no central control)
- 100% transparent on-chain

This makes Scooby one of the most trustworthy, community-driven meme coins in the market.

● Vision & Mission

Vision: Build the most trusted and transparent meme coin community in the world.

Mission: Deliver long-term value through scarcity, hype, and unstoppable community power.

● Market Opportunity

Meme coins like DOGE, SHIB, PEPE reached billions in market cap. Scooby is built stronger with:

- Final reduced supply: 79T
- Deflationary model until 21B
- LP burned forever
- Ownership renounced
- 100% community-driven

● Competitive Advantage

Project	Supply	Liquidity	Ownership	Status
Dogecoin	Infinite	No	Central	Old hype
Shiba Inu	500T+	Locked	Central	Declining
Pepe	420T	Partial	Central	Weak tokenomics
Scooby	79T	Burned	Renounced	Strong&Transparent
